

Tableau for Power Users

16 hours

Course overview:

This course is designed to help you understand and use the important concepts and techniques in Tableau to move from simple to complex visualizations and learn how to combine them in interactive dashboards.

Course Objectives:

- Connect to your data.
- Edit and save a data source.
- Understand Tableau terminology.
- Use the Tableau interface / paradigm to effectively create powerful visualizations.
- Create basic calculations including basic arithmetic calculations, custom aggregations and ratios, date math, and quick table calculations.
- Represent your data using the following visualization types:
 - Cross tabs
 - Geographic maps
 - Heat maps
 - Tree maps
 - Pie charts and bar charts
 - Dual axis and combined charts with different mark types
 - Highlight Tables
 - Scatter Plots
- Build dashboards to share visualizations.

Who Should Attend:

This course is designed for the beginner Tableau user. It is for anyone who works with data – regardless of technical or analytical background.

Required Skills:

Before attending this course, students must have working knowledge of Excel and SQL basic knowledge.

Course Contents:

- Introduction
- Connecting to data
- Simplifying and sorting your data
- Organizing your data
- Slicing your data by date
